DHEA Levels

	Inside Range	Outside Range	
Sample 1 (pm)	<input type="text"/>	0.26 L	
Sample 2 (pm)	<input type="text"/>	0.25 L	

Commentary

Supplemental Dosage:

Decreased DHEA levels may be seen in thyroid disorders, cardiovascular disease, obesity, reduced immunity, rheumatologic diseases, and excess cortisol production, or with administration of pharmacological doses of glucocorticosteroids. Low levels are indicative of a lowered capacity to endure physiological or psychological stress/trauma/injury, and may present with abnormal immune response, with increased incidence of autoimmune disease.
